

Lighting Only Pole

Power Company will own connections and make connections to power source.

- NOTES:
1. A Lighting Only Pole is defined as a Southern Company pole designated to support only lighting service functions such as lighting equipment, lighting conductors, and non-traditional sensor devices without any other authorized attachments including communication, CATV, and Southern Company Distribution facilities. Non-traditional sensor devices include wireless devices, security cameras, gunshot detectors, or other "smart" devices. A Lighting Only Pole may be constructed of wood, metal, concrete, fiberglass, or other material. For poles that are not lighting only poles, refer to Plates SOH-13.001 through SOH-14.005.
 2. All NESC required clearances shall be maintained.
 3. If the wireless device cabinet is more than 14 inches tall, a bracket is required to provide climbing clearance.
 4. See Plate SOI-70.005 for additional notes.
